APPENDIX 3

EARLY MEDICAL PAPERS OF HISTORICAL INTEREST TO SPINE RELATED CONDITIONS.

The following references are extracted from literature searches, the actual papers have not necessarily been accessed. They are aimed at demonstrating medicine’s historical interest in spine-related somatovisceral conditions.

Anon. Legalised bonesetting. (Comment) Lancet 1867;March 2:281.
Anon. Bonesetting in Algeria (Comment) BMJ 1871;Dec 2. 649.
Ancell H. Liebig, His chemistry and reviewers. The laws of Vital Force, as conceived by Liebig, differ totally from those of other physiologists. Lancet 1842;I:278-281.
Bankart ASB. Manipulative surgery in general practice, Lancet 1932;Oct 15:840-844
Brown T. M.D. (Senior physician to the Royal Infirmary of Glasgow.) On irritation of the spinal nerves. The Glasgow Med J. May 1828;131-160. (Historical)
Cyriax J. Rheumatic headache. BMJ 1938;Dec 31:1367-1368
Davis H. Myalgic pains and manipulation. Lancet 1920;Jan 10:121 (Letter)
Elmslie RC. Myalgic pains and manipulation. Lancet 1920;Mar 20:678. (Letter)
Fox RD. On bonesetting (So called). Lancet 1892;Nov 18:843-845.
Griffin W, D. Observations on functional affectations of the spinal cord and ganglion system of nerves, in which their identity with sympathetic, nervous and imitative disease is illustrated. London, Burgess and Hioll, 1834.
Harrison E. Remarks upon the different appearances of the back, breast, and ribs, in persons affected with spinal diseases: and on the effects of spinal distortion on the sanguineous circulation. London Med & Phys J. 1820;44:365-78. (Historical)
Harrison E. Observations respecting the nature and origin of the common species of disorders of the spine with critical remarks on the opinion of former writers on the disease. London Med Physical J 1824;45:103-122. (Historical)
Harrison, Rogers CH, M.R.C.S., Hon. Sec. to the British Medical Assn. Deformities of the spine and chest successfully treated by exercise alone, and without extension, pressure or division of muscles. London, John Churchill, Princes Street, Soho, 1842. (Historical)

Hulet GD. A text book of the principles of osteopathy. 2nd edn. 1904; (Extract 12-21).

Jones CH. Cases of obscure nerve disorder: Two cases of spinal irritation with clinical remarks. Medical Times & Gazette 1876;1:194-195.

*Magenie M. Lectures on physiology. - Upon the function of the spinal nerves. Med Chronicle 1885;II:653-654.

McKenzie J. Brain. 1893;16:312. (Physiol)???

McKenzie J. Honary Medical Officer, Victoria Hospital, Burnley. Contribution to the study of sensory symptoms associated with visceral disease, The Medical Chronicle, a monthly record of the progress of medical sciences, Manchester, 1892;xvi:293-322.

McKenzie J. Symptoms and their interpretation. London Shaw & Sons 1912, pp304. (Physiol)???

Paton G. On the nature and treatment of spinal affections, usually termed cases of spinal irritation. The Edinburgh Medical & Surgical J. April 1850;lxxiii:313-327. (Historical)

Pederick FO. Modes of thought in the healing arts. J Australian Chiropractor's Assn 19??;11(4):22. (Philosophical basis) (Basis of public acceptance)

Ross J, MD, LL.D, FRCP. Joint Professor of the Practice of Medicine in the Victoria University, Senior Assistant Physician to the Manchester Royal Infirmary. On the segmental distribution of sensory disorders. Brain: A J of Neurology, London 1888;x:333-361. (Historical)
Taylor JM. The use and abuse of local support also motor reeducation in human readjustment or orthokinetics. Med Record 1922;101(5):177-182.
Torbet J. Diseases simulating acute inflammatory attacks of various important organs, and dependent upon ganglionic or spinal irritation. Am J Med Sci 1836;XIX:224-227. (Citing Edinburgh Medical & Surgical J for Oct 1835.)
Turnbull RJ. A case of spinal irritation. Am J Med Sciences 1832;xi:38-42. (Historical)
